

# MOSQUITO COLLECTION FORM ([www.wrbu.org](http://www.wrbu.org) Feb2009)

Directions: Machine readable format requiring text (pages 1) or check mark (X) (page 2). Make sure at least one option for each habitat feature is checked on page 2. Write neatly and clearly (to the left where possible) with a pencil within the boxes in the following machine readable style: ABCDEFGHIJKLMNOPQRSTUVWXYZ1234567890 ,./:\'+- (OCRB10)

**Convention for assigning collection code:**

- US1(1) Progeny broods are identified by parentheses following the collection number, e.g. US 1(1) is female # 1 from US colln # 1
- US1(1)-1 As individuals emerge from US 1(1) they are assigned individual numbers as above, e.g. US 1(1)-1, -2, etc
- US1-1 to 99 Rearing numbers from 1 to 99 are used for an adult with both a larval and pupal exuviae preserved
- US1-100 to 199 A three digit number (100-199 ) is used for adults with preserved pupal exuviae only
- US1-500A-9999A When an adult is collected from the field and preserved, a number (500-999) followed by an A is assigned to it
- US1-500L-9999L When a larva is collected from the field and preserved, a number (500-999) followed by an L is assigned to it
- US1-500P-9999P When a pupa is collected from the field and preserved, a number (500-999) followed by a P is assigned to it
